Preparations for a Health Officer, 2nd Year
 A major water storm can be fatal. Planning for such weather conditions and responding to them is a critical task for health officers. This course is designed to provide health officers with the knowledge and skills to plan for such weather conditions. They will learn how to assess the risks of such weather conditions and how to plan for them. This course is designed to provide health officers with the knowledge and skills to plan for such weather conditions. They will learn how to assess the risks of such weather conditions and how to plan for them. This course is designed to provide health officers with the knowledge and skills to plan for such weather conditions. They will learn how to assess the risks of such weather conditions and how to plan for them.

When Weather Preparation Tips:

- Monitor local weather forecasts.
- Have a plan for evacuating.
- Have a plan for sheltering in place.
- Develop an Emergency Communication Plan.
